APPENDIX A – BOUNDARY MAP
APPENDIX B – FY 2025-2026 TAX ROLL

A INTRODUCTION

Pursuant to Chapter 13.12 of the City of Hermosa Beach Municipal Code (the "City") an annual sewer service charge is levied upon each parcel of real property in the City for the overall operation, maintenance and servicing of the City-owned sewer system and capital improvements and reserves. The charge was adopted in 2016 in accordance with Article XIID of the California Constitution (Proposition 218).

Proposition 218, which the voters of the State of California passed on November 5, 1996, contains requirements for the imposition of a fee or charge for property related services. Requirements for fees and charges are contained in Section 6 of Article XIII D. Paragraph (b) describes the requirements for new, existing, or increased fees and charges as follows:

- (1) Revenues shall not exceed the funds required to provide the service.
- (2) Revenues shall not be used for any other purpose.
- (3) The amount of the fee or charge imposed upon any parcel or person as an incident of property ownership shall not exceed the proportional cost of the service attributable to the parcel.
- (4) No fee or charge may be imposed unless the services is actually used by or immediately available to the owner of the property in question.
- (5) No fee or charge shall be imposed for general governmental services, i.e., police, ambulance, library, where the service is available to the public at large in substantially the same manner as it is to the property owners.

This report and recommended charges complies with all five of these requirements.

- (1) Revenues generated by this charge will not exceed funds required to provide sewer services and shall not be used for any other purpose, besides what has been described herein.
- (2) The sewer charge is the proportional cost of provided service to the parcels in the City and the charge is for actual use or is immediately available to the property in question

This report describes the FY 2025-2026 sewer charge amount to be levied on property in the City and is organized into the sections listed below. A map showing the boundary of the property subject to the annual sewer service charge is included in Appendix A herein. The boundary is coterminous with the City boundary.

- **Section B:** This section provides a summary of the types of improvements and services that are funded by the annual sewer charge.
- **Section C:** This section provides a summary of the estimated FY 2025-2026 costs.

- **Section D:** This section describes the calculation of the FY 2025-2026 sewer charge.
- **Section E:** This section provides the engineer's certification.

B PLANS AND SPECIFICATIONS ¹

1 City Sewer Improvements

The sewer improvements within the City of Hermosa Beach for which the City proposes to be responsible for maintenance and operation of the sewer system as well as levy and collect charges to maintain such improvements, includes, but is not limited to, and may be generally described as follows:

- Approximately 194,000 feet of main sewer lines consisting of the following:
 - 28,868 linear feet (LF) of 6" sewer lines;
 - 149,993 linear feet (LF) of 8" sewer lines;
 - 4,204 linear feet (LF) of 10" sewer lines;
 - 5,071 linear feet (LF) of 12" sewer lines;
 - 1,254 linear feet (LF) of 15" sewer lines;
 - 1,150 linear feet (LF) of 18" sewer lines;
 - 805 linear feet (LF) of 21" sewer lines; and
 - 2,655 linear feet (LF) of 24" sewer lines.
- 880 Sewer Manholes
- Four Lift/Pump station: 394 – 21 inch and 2,629 – 24 inch
 - Three (3) Beach restroom pumps
 - The Strand - 34th

The historical plans and specifications for the City-owned sewer improvements are incorporated and contained in the sewer construction plans and specifications for the various sewer segments of the sewer system within the City of Hermosa Beach. These plans and specifications are voluminous and are not bound in this report but by this reference are incorporated and made a part of this report. The specific plans and specifications for the City-owned sewer improvements are on file with the Public Works Department at the City.

2 Operations, Maintenance and Services

The City of Hermosa Beach proposes to collect funds to cover the expenses for the overall operation, maintenance and servicing of the city-owned sewer system as well as funds that may be necessary to pay for capital outlay expenditures including repairs, rehabilitation or replacement of equipment or facilities. The following is a summary of the services and activities associated with the maintenance, operation, servicing and capital outlay

¹ Based on information provided by the City and included in the City of Hermosa Beach Master Plan.

expenditures for the City's sewer system.

The frequency, extent and/or level of the services and activities identified below may be modified based on available funding and priorities as determined by the City:

2.1 Preventive Maintenance

One of the City's primary objectives for assuming responsibility and management of the operation and maintenance of the City's sewer system is to provide a cost-effective and efficient program that will ensure the integrity and long term stability of the sewer system. This is best accomplished by implementing a preventive maintenance program that addresses the entire sewer system. This preventive maintenance should include, but is not limited to, regular inspection of the sewer manholes, pipes, siphons, pump stations and related facilities as well as regular cleaning, repair, and related activities as warranted. These activities are intended to detect and correct potential problems before they develop into major problems.

The following is a general summary of those preventive maintenance activities.

- **Sewer Line and Manhole Inspection:** The interior and exterior of manholes to be inspected (at least once a year) for any structural defects, sewage flow condition, presence of vermin or rodents, deleterious industrial waste, odors, and any signs of unusual settlement around or evidence of debris within the manholes and along sewer alignments.
- **Sewer Line Cleaning -** Sewer lines will be videoed and cleaned by hydro jet or rodding as needed based on a scheduled that ensures each sewer line is addressed at least every three-five years. The actual frequency of cleaning may vary based on inspection records. Sewer lines known to cumulate grease, garbage grinds, or sand may be addressed more frequency with possible monthly, quarterly, or semi-annual cleaning schedule. Those areas prone to root growth may be periodically rodded or chemically treated.
- **Sewage Pump Stations -** All pump stations are equipped with telemetry/alarm systems and will be inspected at least once a week. Pumps and motors will be inspected and lubricated, control mechanisms and valves will be checked and adjusted as necessary. Pump station equipment will be repaired or modified as required.
- **Gas Trap Manholes and Siphons -** Inspected and cleared of any stoppages or flow restrictions on a monthly basis.
- **Drop Manholes -** Inspected and cleared of stoppages and flow restrictions on variable frequencies based on prior inspection records.
- **Vermin and Rodent Control -** On an as-needed basis, sewers infested by insects will be chemically treated, and those infested by rodents will be baited.

2.2 Capital Outlay, Rehabilitation and Replacement

The City has adopted a pay-as-you-go method to pay for addressing major repairs and rehabilitation of the sewer system on a priority basis. However, in addition the City plans to develop and implement a long-term replacement and refurbishment program that will ensure not only the short term integrity of the sewer system, but also the longterm integrity and continue service to the community. As the city's sewer collection system ages, the risk of failure will ultimately increase due to deterioration, collapse, blockage, excessive inflow and infiltration, overflow, and other potential service interruptions. Therefore, while the scheduling of major repairs, rehabilitation projects and replacement projects will ultimately be implemented based on available funding, highest priority will be given to structural deficiency. However, by developing a long-term replacement and refurbishment program with the goal of eventually addressing the entire system, the City may also address hydraulic deficiency in addition to the structural deficiency.

2.3 Sewer System Management

- Mapping: As-built plans of the sewer facilities will be maintained by the City. Data on the plans, such as system locations and alignment, pipe material, size, etc., will be maintained and stored electronically by the City. These maps will be available and utilized by the field crews for work scheduling and responding to emergencies, and will be updated to reflect any changes in the system.
- Work Scheduling - Field crew activities will be recorded and tracked by the City utilizing various forms including, but not limited to service requests, cleaning reports, sewer maintenance daily reports, overflow reports forms, project work orders, etc.

3 City Sewer System Capital Improvement Program

In order to effectively establish a capital improvement program to implement the needed wastewater system improvements, an equitable method of prioritizing projects must be established. In general, sewer facilities having the greatest degree of defects and deterioration at the present time will receive higher priority than those which are in better condition.

In 1994, an Infrastructure Management Project Report, prepared by ITX, analyzed the City's sewer network and also recommended a rehabilitation program to address the immediate needs of the sewer network.

In 2008, considering the City's 85 years old sewer network of concrete and clay pipes, City embarked on the implementation of a Sanitary Sewer Master Plan that updated the Sewer portion of the Infrastructure Management Project Report prepared by ITX in 1994. Building on the work the City had completed through the undertaking of previous studies and projects, the Sewer Master Plan was prepared based upon newly collected data from the

2008 Closed Circuit TV (“CCTV”) inspection of the entire sewer system. This Sewer Master Plan, dated April 2009 and revised March 2011, listed the existing defects and deficiencies and identified projects for improvements for a 10 year program. At the end of a ten-year rehabilitation program, CCTV inspection of the entire sewer system is typically recommended for monitoring any remaining or newly developed physical deterioration and maintenance problems. This would allow the City to continue with development and implementation of a cost effective rehabilitation program that will ensure the long-term integrity of the sewer system and service to the community.

The City considered bonding for needed sewer improvements, however has decided to adopt a pay-as-you-go method to pay for addressing major repairs and rehabilitation of the sewer system based on the priority set in the Sewer Master plan. In support of this endeavor, the City updated their Sewer Master Plan in 2017.

The 2017 Sewer Master Plan identified 9.76 miles of sewer (out of 37 miles total) that were in need of improvements at that time – with an estimated cost of \$14.4 million (in 2017 dollars). At the current pace, the City is on track to complete the remaining sewer improvements within approximately 10 years. This timeline is a function of Public Works staffing and funding levels and has allowed staff to address priority repairs.

It is common for sewer master plans to be updated roughly every 10 years, as the system continues to age and deteriorate independent of repair schedule. Staff intends to submit a new CIP request in FY 2026/27 to update the master plan, which is estimated to cost approximately \$300,000 and is expected to result in a revised list of priorities.

C ESTIMATES OF COSTS

The FY 2025-2026 costs for the maintenance, operation, and servicing of the City's existing sewer system improvements as well as the funding of necessary future capital improvements and reserves (replacement funding) is shown in the table below.

Table 1: Estimated Costs for FY 2025-2026

Description	Amount
Estimated Operations and Maintenance	\$830,000
Estimated Costs for Improvements and Reserves	\$1,000,000
Total	\$1,830,000

For FY 2025-2026, the maximum sewer service charge that can be collected pursuant to Section 13.12.010 of the City Municipal Code as discussed in Section D herein, cannot exceed \$1,830,000.

D CHARGE CALCULATION AND PROPOSED CHARGES

The FY 2025-2026 sewer service charge is based on the Equivalent Sewer Units ("ESU") assigned to each parcel. The ESU is based on sewer generation factors for each parcel as described below.

1 Sewage Generation Factors

A numeric relationship between the various lots and parcels is necessary for the allocation of the costs of sewer maintenance among the lots and parcels. It is customary to relate the various land uses to the single-family residential lot which is established as one ESU, and all other lots and parcels are related proportionally to the single-family residential lot. Based on sewage generation rates, a typical single-family lot generates 260 gallons per day in Los Angeles County as defined in Chapter 13.12.030 of the City Municipal Code. Therefore, for purposes of comparison of the various land uses for lots and parcels, 260 gallons per day is designated as the equivalent of 1.0 ESU.

1.1 Residential Land Uses

Pursuant to Chapter 13.12.030 of the City Municipal Code, the ESU factors are outlined below:

Table 2: ESU Determination

Land Use	ESU
Single-Family Units	1.0
Condominium Units	1.0
Multi-Family Units	0.6
Vacant Residential	0.5

Single family residential units will be charged at 1.0 ESU per parcel, the multi-family residential parcels will be charged at 0.6 ESU per residential unit located on the parcel and condominiums at 1.0 ESU per parcel as they are similar to single family residents in use. Vacant residential parcels are charged 0.5 ESU since the sewer service, though not used, is immediately available to such property.

1.2 Non-Residential Land Uses

The ESU for various non-residential land uses is calculated by the following equation:

$$\text{ESU} = [\text{Commercial Water Consumption GPD}] / 260 \text{ GPD}$$

For non-residential property, water consumption values for calendar year 2024 for all property in the City was provided by California Water Services Company (water utility company that provides water service to the City).

1.3 Government Parcels

There are several parcels that receive sewer service that are owned and operated by

local government. Proposition 218 requires that each parcel not pay more than the proportional cost of providing the service. Therefore, because these government parcels use the City's sewer service, they are included in the computation of the charge and are charged.

2 Calculation of the Charge

Pursuant to Section 13.12.010 of the City Municipal Code, beginning July 1, 2015, the amount of the charge for each parcel shall be computed by multiplying one hundred fifteen dollars (\$115.00) by the number of ESUs for the current land use of the parcel.

Beginning July 1, 2016, and each July 1st through July 1, 2020, the sewer service charge shall be increased for inflation by the annual increase in the Consumer Price Index for Urban Wage Earners and Clerical Workers in the Los Angeles-Riverside-Orange County, CA Area ("CPI-W"), including all items as published by the U.S. Bureau of Labor Statistics as of March 1st of each year, not to exceed two (2) percent per year.

Beginning July 1, 2022, the amount of the charge for each parcel shall be computed by multiplying \$132.93 by the number of ESUs for the current land use of the parcel.

Beginning July 1, 2023, and each July 1st through July 1, 2026, the sewer service charge shall be increased for inflation by the annual increase in the CPI-W as of January 1 of each year, not to exceed five percent (5%) per year.

Note that due to the pandemic in 2020, staff did not move forward with applying the CPI-W to the sewer charge in FY 2021-2022.

The following table shows the percentage increase of the sewer service charge each year since inception.

**Table 3: Consumer Price Index
Los Angeles Urban Wage Earners and Clerical Workers**

Year Ending	Percentage Increase in CPI-W	Percentage Increase in Sewer Service Charge	Sewer Charge
July 1, 2016	NA	NA	\$115.00
July 1, 2017	1.7	1.7	\$116.96
July 1, 2018	2.5	2.0	\$119.29
July 1, 2019	3.7	2.0	\$121.68
July 1, 2020	2.9	2.0	\$124.11
July 1, 2021	3.5	2.0	\$126.60
July 1, 2022	1.1	0.0	\$126.60
July 1, 2023	7.6	5.0	\$132.93
July 1, 2024	5.8	5.0	\$139.58
July 1, 2025	2.0	2.0	\$142.37
July 1, 2026	3.5	3.5	\$147.35

The new charge for FY 2025-2026 is \$147.35/ESU which is equal to an increase of 3.5% from FY 2024-2025.

3 Proposed Sewer Charges for Fiscal Year 2025-2026

Since the amount collected through the levy of the FY 2025-2026 sewer charge (\$1,334,986) is less than the City's estimated costs for FY 2025-2026 as shown in Section C herein, the levy will be limited to the lesser of the two amounts or \$1,334,986 in this case.

A listing of the Assessor's Parcel Numbers to be levied the Sewer Service Charge for FY 2025-2026 is included in Appendix B herein and will be filed with the City Clerk in an electronic format prior to the public hearing regarding the levy and collection of the charges.

The following table provides a summary of the estimated ESUs by land use anticipated for Fiscal Year 2025-2026 based on the County's assigned land use classification as of January 1, 2024 for each parcel within the City. The County's land use classifications as of January 1, 2025 will not be available until summer of 2025.

Table 4: ESUs by Land Use

Land Use	Number of Parcels	Number of Units	Number of ESUs	FY 2025-2026 Levy
Single-Family/Condo	5,095	5,095	5,095.00	\$750,748.25
Multi-Family	1,328	4,816	2,889.60	\$425,782.56
Vacant Residential	58	NA	29.00	\$4,273.44
Non-Residential Property	432	NA	1,046.36	\$154,181.64
Total	6,913	9,911	9,059.96	\$1,334,985.89
