If Hermosa Beach is going to spend \$70,000 for a new audio/video system then the participation from the public via Zoom should continue. Also re-watching the city council meeting dated Nov. 14, 2023 a company such as Pegasus should be providing a complete audio/video system. So the concern of the audio should possibly be clarified from Pegasus to the city council so Hermosa Beach understands what we are paying for. If Manhattan Beach is using Pegasus also then I am thinking we will be provided the same type of system. Look forward to this updated system and getting a more informed and interaction from the community.

I would like for City Council meetings, as well as commission and board meetings, to continue to allow the public to participate remotely via Zoom. I think that it is important for the City to obtain as much public comment on issues as possible. Allowing remote participation provides residents a convenient method to speak to the council and commissions in real time.
