Subject: Mural

Hi David,

In working with the owners they have agreed it will be best to keep the mural. I am not sure if you have 3d images in your presentation but please see attached revised images that show the mural staying.

Also, this is down the road and they just want to know what their options are. When the covenant expires are they able to take down the mural and put up their own art. Does that need to be permitted like a sign would need to be permitted?
